Newsletter Editor
Gary Brown, WW4JDO
Web Master
Gary Brown, WW4JDO

NET CONTROL OPERATORS

Feb – Jeff, WO4J
Mar – Steve, K4SEH
Apr – Will, K4WAL

FROM THE PREZ

Hello my radio-active friends. I am honored to have been elected as your president for the next year. I expect our little club to do great things and have lots of fun this year. We already have some good speakers lined up and some fun activities like a fox hunt and fish fry to boot. Please join us as we work together to make 2010 a banner year for the CARC. 73.

Gary, WW4JDO

WEB SITE

Just in case you didn't already know, our club has a web site located at www.chipolaarc.org. It has a copy of the club calendar, the latest club meeting minutes, and lots of other help stuff like a local frequency list. I ask you to help me with ideas to make the site better. Speaking of making web sites better, the ARRL has announced they are launching a new web site with enhanced member services. The new web site will be available at the end of this month. Please check out both web sites when you get a chance.

CQ

From the 1969 ARRL "The Radio Amateurs Operating Manual"

The telegraph call CQ was born on the English Telegraph nearly a century ago as a signal meaning "All stations. A notification to all postal telegraph offices to receive the message." Its meaning was close to the present meanings of QNC and QST. Like many other telegraph terms which originated on the landlines, CQ was brought over into radio and used as a general call to all ships by the Marconi Company. Other companies used KA until the London Convention of 1912 which adopted CQ as the international general call or "attention" signal. CQ still means, literally, "attention" but in amateur radio its meaning is perhaps more accurately described by Thomas Raddell who compared it to yelling "Hey Mac!" down a drain pipe.
